

AC6482

16A WIFI Thermostat - Black

This wifi thermostat is a stylish and affordable choice for user-friendly temperature control. The touch button menu ensures easy navigation, complemented by a stylish backlit LCD screen for optimal visibility. When paired with the companion app, control and programming of all the thermostats functions is achieved via your smartphone.

With a robust 16A, 3600W output, our thermostat delivers consistent and reliable performance. The built-in battery backup ensures uninterrupted operation, providing peace of mind and compliance with Lot 20 standards underscores our commitment to energy efficiency.

The thermostat is backed by a one-year warranty, and is compatible with all major EUFH brands.
