

AC66272

16A Wireless Thermostat and Hub - Black

The AC66269 touch button thermostat can be combined with a hub to become a wireless thermostat that is easily accessed from anywhere using an App. Control of your underfloor heating is possible from any location via the App or through IFTTT, Amazon Alexa, Apple HomeKit or Google Assistant.

Using geo-location to track the position of your smartphone this thermostat and hub combination can calculate when to switch your underfloor heating off if you have left the property and on again before your return.

Control multiple rooms by communicating with a series of individual thermostats, as part of a networked solution around the home.

Technical Specification	
Supply Voltage	230 V AC
Output	Max 16A
Display	Backlit Blue LCD Screen
Output Delay	00-15 Minutes (00 = Default)
Floor Limit Range	+20 / +45°C (28°C = Default)
Heating Schedule	4 event
On/Off Differential	1°C-3°C
Dimensions (H/W/D)	85/85/40mm (18mm depth when fitted)
External Sensor	NTC (10K ohm) 3m
Weight	150g
IP Rating	IP20
Manufactured In	China
Approvals	UKCA, CE, IP21
Approved To	EN 60335-1:1998, EN60335-2-17:1999, IEC 60730
Compliant With	Part L, 18th Edition IEE Wiring Regulations EN 60335-1:1998, EN60335-2-17:1999 IEC 60730, Lot 20

- Easy to use and quick to navigate
- Remote access and control via simple to use companion App
- Compatible with Amazon Alexa, Apple HomeKit, Google Assistant and IFTTT
- Access an App on iOS, Android and Windows devices
- Mesh networking for signal reliability
- Programme 4 heating events per day
- Simple to set up
- Monitor energy use in kW and £s
- Max 16A, 3800W output
- 1 year battery backup
- Lot 20 compliant
- 1 Year Warranty
